

COLORADO LAW FOR EYE PROTECTION

23-3-102: Courses in which devices to be used—substances and activities dangerous to eyes.

1. Eye protective devices shall be worn in courses including, but not limited to, vocational or industrial art shops or laboratories and chemistry, physics, or chemistry-physics laboratories, at any time at which the individual is engaged in, or observing, an activity or the use of hazardous substances likely to cause injury to the eyes
2. Hazardous substances likely to cause physical injury to the eyes include materials which are flammable, toxic, corrosive to living tissues, irritating, strongly sensitizing, or radioactive or which generate pressure through heat, decomposition, or other means.
3. Activity or the use of hazardous substances includes, but is not limited to the following:
 - a. Working with hot or molten metal;
 - b. Milling, sawing, turning, shaping, cutting, grinding, and stamping of any solid materials;
 - c. Heat treating, tempering, or kiln firing of any metal or other materials;
 - d. Gas or electric arc welding;
 - e. Working with hot liquids, solids, or chemicals which are flammable, toxic, corrosive to living tissues, irritating, sensitizing or radioactive or which generate pressure through heat, decomposition, or other means.

I have read and I understand the state law in regards to eye protection. I also understand that Northglenn High School does not carry insurance for me in case of accident. Eye goggles have been provided for me to wear and I have been instructed to wear them at all times while working with equipment in the art room. I agree to take responsibility to use the goggles provided or to use eye protection devices of my own. (The cost of replacement for lost or broken goggles is \$3.00.)
